Problem Statement

Managing both family expenses and daily expenses manually (in notebooks or spreadsheets) is difficult, time-consuming, and error-prone. Families face challenges in tracking who spent what, on which category, and when. There is a need for a centralized digital system that records expenses, categorizes them, and automatically calculates totals for better financial planning.

Objective

1. To create a ServiceNow application for tracking daily and family expenses.
2. To record expense details including Number, Family Member Name, Expense Category, Date, Comments, and Amount.
3. To automate calculations of total expenses.
4. To generate monthly and yearly reports for analysis.
5. To support families in understanding spending habits and improving savings.

Skills:

1. ***ServiceNow Development:*** Building custom applications and forms.
2. ***Skills:*** Storing and retrieving expense data.
3. ***Analytical Thinking:*** Designing reports and dashboards.
4. ***Documentation & Project Skills:*** Planning, structuring, and presenting the project.

Task Initiation:

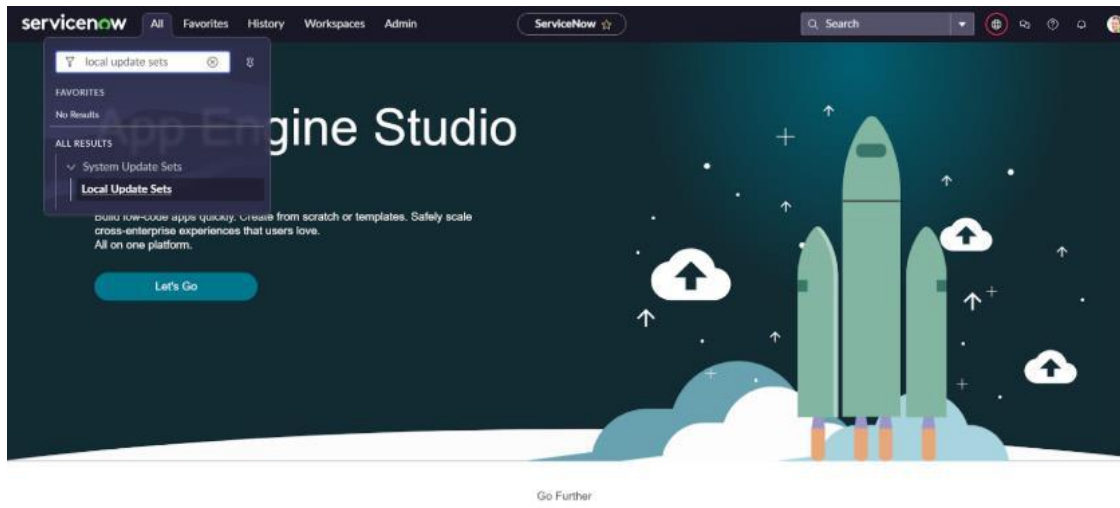

Milestone: User

Activity: Setting Up ServiceNow Instance:

1. Sign up for a developer account on the ServiceNow Developer site "<https://developer.servicenow.com>".
2. Once logged in, navigate to the "Personal Developer Instance" section.
3. Click on "Request Instance" to create a new ServiceNow instance.
4. Fill out the required information and submit the request.
5. You'll receive an email with the instance details once it's ready.
6. Log in to your ServiceNow instance using the provided credentials.
7. Now you will navigate to the ServiceNow.

Activity: Creation Of New Update Set:

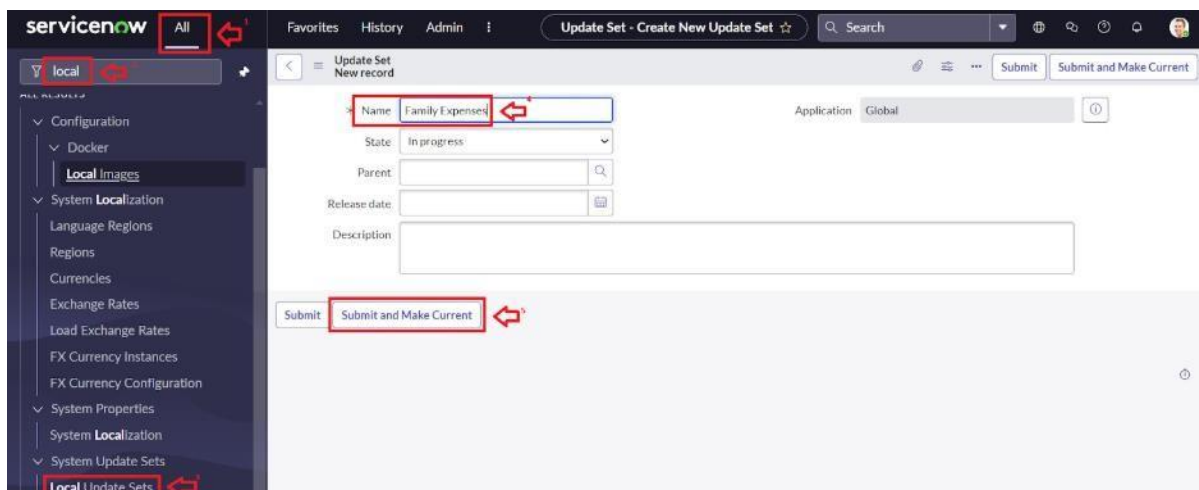

1. Go to All >> In the filter search for Local Update set > click on New.

2. Enter the Details as:

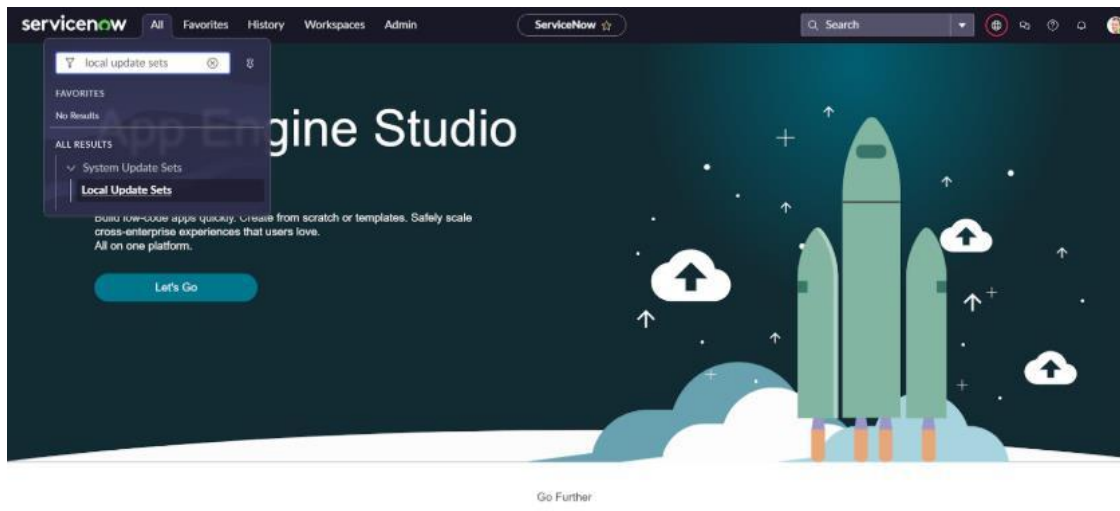

Name: Family Expenses

3. Then click on Submit and Make current.

Activity: Creation Of Table

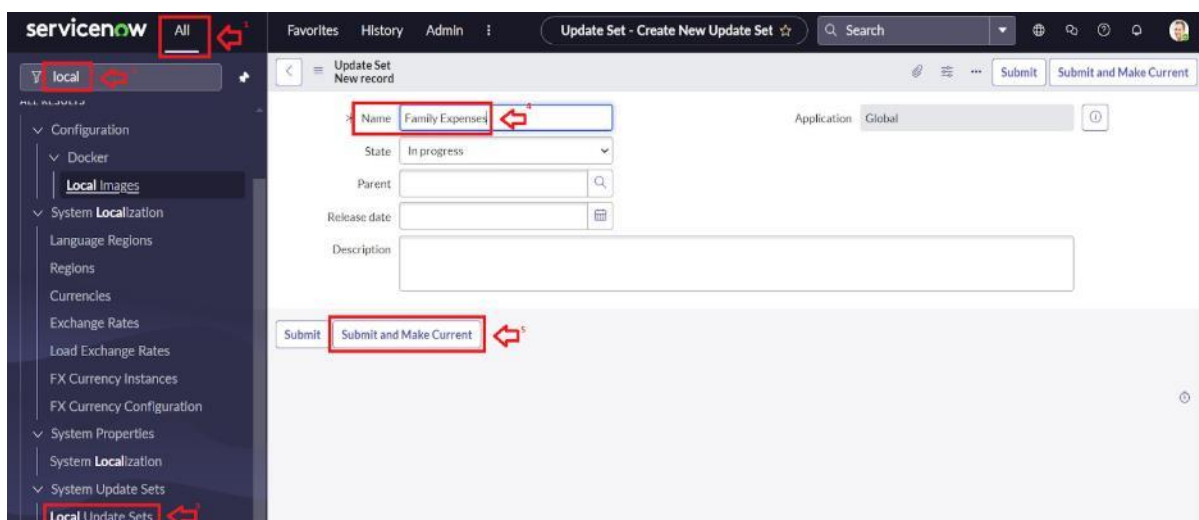

1. Go to All >> In the filter search for Local Update set > click on New.

2. Enter the Details as:

Name: Family Expenses

3. Then click on Submit and Make current.

Milestone: *Creation Of Table*

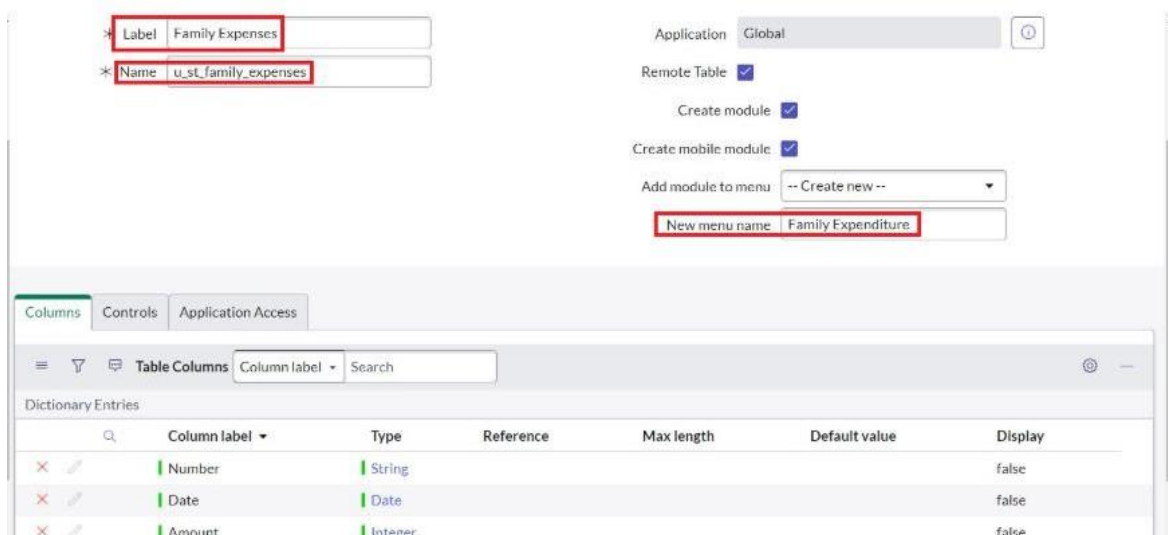

Activity: I. Creation of Family Expenses Table

1. Go to All > In the filter search for Tables > click on New.
2. Enter the Details:

Label: Family Expenses

Name: Auto-Populated

New menu name: Family Expenditure

The screenshot shows the configuration interface for creating a new table. The 'Label' field is set to 'Family Expenses' and the 'Name' field is set to 'u_st_family_expenses'. The 'Application' is set to 'Global'. The 'Remote Table' checkbox is checked. The 'Create module' checkbox is checked. The 'Create mobile module' checkbox is checked. The 'Add module to menu' dropdown is set to '-- Create new --'. The 'New menu name' field is set to 'Family Expenditure'.

Below the configuration fields, there is a section for 'Columns'. The 'Columns' tab is selected. The 'Table Columns' section shows a list of columns with the following details:

Column label	Type	Reference	Max length	Default value	Display
Number	String			false	false
Date	Date			false	false
Amount	Integer			false	false

3. Go to the Header and right click there>> click on Save.

Activity: II. Creation of Columns (Fields)

1. Near Columns Double click near insert a new row.
2. Give the details as:

Column label: Number

Type: String

3. Double clicks on insert a new row again

4. Give the details as:

Column label: Date

Type: Date

5. Double clicks on insert a new row again

6. Give the details as:

Column label: Amount

Type: Integer

7. Double clicks on insert a new row again

8. Give the details as:

Column label: Expense Details

Type: String

Max length: 800

9. Go to the Header and right click there>> click on Save.

Activity: III. Making Number Field an Auto-Number

1. Double click on the Number Field/Column.
2. Go down and double click on Advanced view
3. In Default Value:

Use dynamic default : check the box

Dynamic default value : Get Next Padded Number

4. Click on Update.

- 5.
6. Go to All >> In the filter search for Number Maintenance >> select Number Maintenance
7. Click on New.
8. Enter the below Details:

Table : Family Expenses

Prefix : MFE

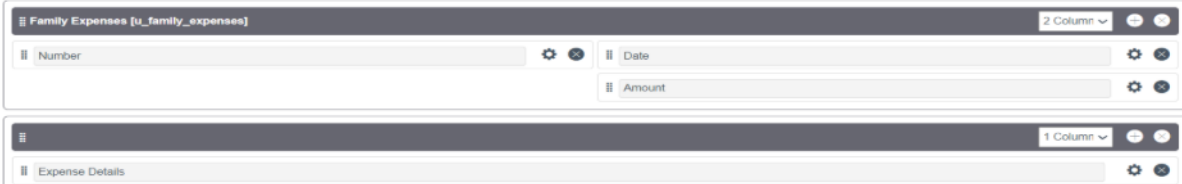

9. Click on Submit

9. Click on Submit.

Activity: IV. Configure the Form

1. Go to All >> In the filter search for Family Expenses >> Open Family Expenses
2. Click on New
3. Go to the Header and right click there>> click on Configure >> Select Form Design
4. Customize or Drag Drop the form as per your requirement.

5. Make Number Read-Only Field by clicking on the gear icon and checking Read-Only
6. Make Date, Amount Mandatory Field by clicking on the gear icon and checking Mandatory
7. Click on Save.

Milestone: Creation Of Table Daily Expenses

Activity: I. Creation of Daily Expenses Table

1. Go to All > In the filter search for Tables > click on New.
2. Enter the Details:

Label : Daily Expenses

Name : Auto-Populated

Add Module to menu : Family Expenditure

-
3. Go to the Header and right click there>> click on Save.

Activity: II. Creation of Columns(Fields)

1. Near Columns Double click near insert a new row.
2. Give the details as:

Column label : Number

Type : String

3. Double click on insert a new row again
4. Give the details as:

Column label : Date

Type : Date

5. Double click on insert a new row again
6. Give the details as:

Column label : Expense

Type : Integer

7. Double click on insert a new row again
8. Give the details as:

Column label : Family Member Name

Type : Reference

Max length : 800

9. Double click on insert a new row again
10. Give the details as:

Column label : Comments

Type : String

Max length : 800

11. Go to the Header and right click there>> click on Save.

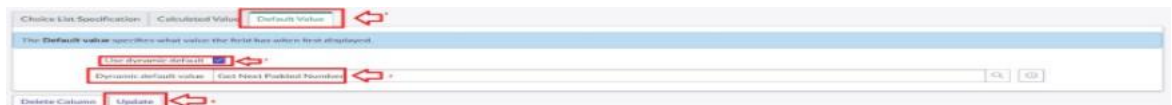

Activity: III. Making Number Field an Auto-Number

1. Double click on the Number Field/Column.
2. Go down and double click on Advanced view
3. In Default Value:

Use dynamic default : check the box

Dynamic default value : Get Next Padded Number

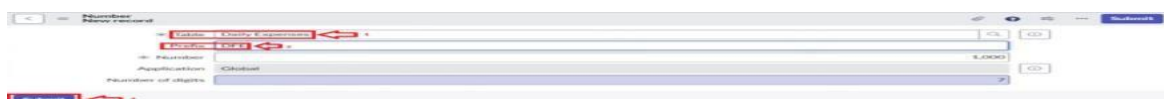

4. Click on Update.

- 5.
6. Go to All >> In the filter search for Number Maintenance >> select Number Maintenance
7. Click on New.
8. Enter the below Details:

Table : Family Expenses

Prefix: MFE

9. Click on Submit.

Activity: IV. Configure the Form

1. Go to All >> In the filter search for Daily Expenses >> Open Daily Expenses
2. Click on New
3. Go to the Header and right click there>> click on Configure >> Select Form Design
4. Customize or Drag Drop the form as per your requirement.

The screenshot shows a form configuration window for 'Daily Expenses [u_daily_expenses]'. The form is divided into two main sections. The top section is titled '2 Column' and contains four fields: 'Number', 'Date', 'Family Member Name', and 'Expense'. Each field has a gear icon next to it, indicating it can be configured. The bottom section is titled '1 Column' and contains a 'Comments' field, also with a gear icon.

5. Make Number Read-Only Field by clicking on the gear icon and checking Read-Only
6. Make Date, Family Member Name Mandatory Field by clicking on the gear icon and checking Mandatory
7. Click on Save.

Milestone: Creation of Relationship:

Activity: Creation of Relationship between Family Expenses and Daily Expenses tables

1. Go to All >> In the filter search for Relationships >> Open Relationships
2. Click on New.
3. Enter the details:

Name : Daily Expenses

Applies to table : Select Family Expenses

Daily Expenses : Select Daily Expenses

4. Click Save.

Configuring Related List on Family Expenses:

Activity: Configuring Related List on Family Expenses

1. Go to All >> In the filter search for Family Expenses >> Open Family Expenses
2. Click on New
3. Go to the Header and right click there>> click on Configure >> Select Related Lists
4. Add Daily Expenses to the Selected Area.
5. Click on Save

Milestone: Creation of Business Rules:

Activity: Creation of Business Rules

1. Go to All >> In the filter search for Business Rules.
2. Under System Definition Select Business Rules then click on New.
3. Enter the Details:

Name: Family Expenses BR

Table: Select Daily Expenses

Check Advanced

Business Rule
New record

ss rule is a server-side script that runs when a record is displayed, inserted, deleted, or when a table is queried. Use business rules to automatically change values in form fields when the specified conditions are met

Name: Family Expenses BR

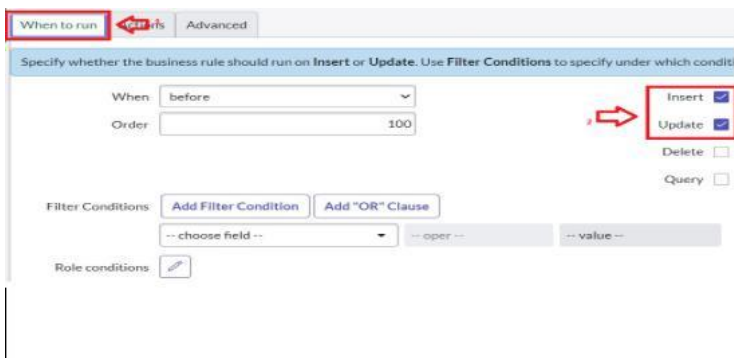

Table: Daily Expenses (u.daily_expenses)

Role conditions

5. In Advance (we write the code): Write the below code >>

```
(function executeRule(current, previous /*null when async*/) {  
  
    var FamilyExpenses = new GlideRecord('u_family_expenses');  
    FamilyExpenses.addQuery('u_date',current.u_date);  
    FamilyExpenses.query();  
    if(FamilyExpenses.next())  
    {  
        FamilyExpenses.u_amount += current.u_expense;  
        FamilyExpenses.u_expense_details +=  
        ">" + current.u_comments + ":" + "Rs." + current.u_expense + "/ -";  
        FamilyExpenses.update();  
    }  
    else  
    {  
        var NewFamilyExpenses = new GlideRecord('u_family_expenses');  
        NewFamilyExpenses.u_date = current.u_date;  
        NewFamilyExpenses.u_amount = current.u_expense;  
        NewFamilyExpenses.u_expense_details +=  
        ">" + current.u_comments + ":" + "Rs." + current.u_expense + "/ -";  
        NewFamilyExpenses.insert();  
    }  
  
})(current, previous);
```

```

1  (function executeRule(current, previous /*null when async*/) {
2
3      var FamilyExpenses = new GlideRecord('u_family_expenses');
4      FamilyExpenses.addQuery('u_date',current.u_date);
5      FamilyExpenses.query();
6      if(FamilyExpenses.next())
7      {
8          FamilyExpenses.u_amount += current.u_expense;
9          FamilyExpenses.u_expense_details += ">" + current.u_comments + ":" + "Rs." + current.u_expense + "/-";
10         FamilyExpenses.update();
11     }
12     else
13     {
14         var NewFamilyExpenses = new GlideRecord('u_family_expenses');
15         NewFamilyExpenses.u_date = current.u_date;
16         NewFamilyExpenses.u_amount = current.u_expense;
17         NewFamilyExpenses.u_expense_details += ">" + current.u_comments + ":" + "Rs." + current.u_expense + "/-";
18         NewFamilyExpenses.insert();
19     }
20 }
21 })(current, previous);

```

6. Go to the Header and right click there>> click on Save.

Milestone: Configure the Relationship:

Activity: Configure the Relationship

1. Go to All >> In the filter search for Relationships >> Open Relationships.
2. In that, open Daily Expenses Relationship.
3. For Applies to table : Select Family Expenses.
4. In Query with : write the below Query.

```
(function refineQuery(current, parent) {
```

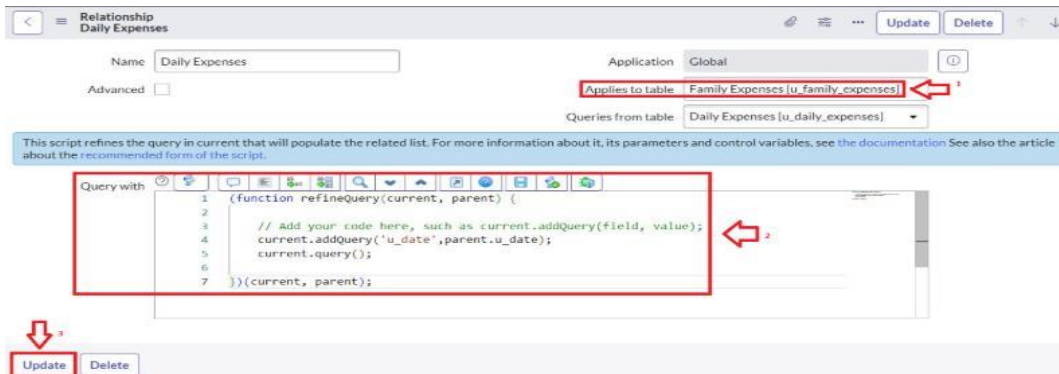

```
// Add your code here, such as current.addQuery(field, value);
```

```
current.addQuery('u_date',parent.u_date);
```

```
current.query();
```

```
})(current, parent);
```

5. Click on Update.

Relationship
Daily Expenses

Name: Daily Expenses

Advanced ☐

Application: Global

Applies to table: Family Expenses (u_family_expenses)

Queries from table: Daily Expenses (u_daily_expenses)

This script refines the query in current that will populate the related list. For more information about it, its parameters and control variables, see the documentation. See also the article about the recommended form of the script.

Query with

```

1 (function refineQuery(current, parent) {
2
3   // Add your code here, such as current.addQuery(field, value);
4   current.addQuery('u_date', parent.u_date);
5   current.query();
6
7 })(current, parent);
  
```

Update Delete

Conclusion

The project “Calculating Family and Daily Expenses using Service Now” helps in tracking and managing both routine and household expenses effectively.

It reduces manual effort and errors by automating calculations.

Daily expenses like food, travel, and utilities can be logged easily.

Family-level expenses such as rent, education, and bills are well organized.

Reports and dashboards give a clear view of monthly and yearly spending.

This system supports better budgeting and saving habits.

The use of Service Now proves its flexibility beyond IT services.

The project improved our skills in app creation, work flows, and reporting.

It provides a simple yet practical solution for financial management. Future enhancements like AI predictions and bank integration can make it more powerful.
